TINY WINS

CLIENT PROPOSAL

A personal growth platform for recognizing, recording, and reflecting on everyday progress.

1. Problem Statement

Many people struggle to recognize and appreciate their small daily achievements. As a result, they may overlook their personal progress and forget how far they have come over time.

Additionally, there is a lack of simple, organized spaces where individuals can record their achievements and personal reflections, preserve them as a meaningful growth history, and revisit them through intelligent AI-powered interactions.

2. Target Users

Tiny Wins is designed for individuals who are interested in personal growth, self-improvement, and building positive habits. It is particularly useful for people who want to recognize their small daily achievements, track their progress over time, and maintain a meaningful record of their personal development.

The platform is suitable for anyone who wants a simple and supportive way to document their journey, reflect on their accomplishments, and gain insights from their recorded experiences.

3. Current Challenges

1. **Overlooking Small Achievements:** People tend to focus on major milestones while overlooking the small daily accomplishments that contribute to their development.
2. **Difficulty Recognizing Progress:** Daily achievements may seem insignificant when viewed individually, making it difficult to recognize long-term personal growth.
3. **Lack of Organized Records:** People often lack a centralized space to document and preserve their achievements and personal reflections.
4. **Difficulty Reviewing Past Progress:** Without an organized history, revisiting past accomplishments and identifying patterns of growth becomes challenging.
5. **Limited Intelligent Insights:** Traditional achievement-tracking methods do not provide intelligent ways to interact with recorded experiences and extract meaningful insights.

4. Proposed Solution

Tiny Wins is a personal growth platform that enables users to record their small achievements, organize their personal progress, preserve meaningful experiences, and interact with their achievement history through AI-powered features.

Rather than serving only as an achievement log, Tiny Wins provides a personal space where users can document their journey, revisit their experiences, recognize their development, and gain insights from the achievements they have recorded.

5. Key Features

Feature	Description
Achievement Tracking	Record, categorize, and preserve daily achievements.
Personal Growth History	Review past achievements and track personal development over time.
AI Wins Assistant	Ask questions and receive answers grounded in saved achievements.
AI-Powered Growth Insights	Generate summaries and insights about personal progress.
Future Letters	Write personal letters that become accessible at a scheduled future date.
Telegram Integration	Connect Telegram to facilitate interaction with the platform.

6. Expected Value

1. **Greater Self-Awareness:** Help users notice their small achievements and appreciate their progress.
2. **Visible Personal Progress:** Turn scattered achievements into a clear record that reflects a growth journey over time.
3. **Better Reflection:** Make it easier to revisit past experiences and reflect on personal accomplishments.
4. **Personalized AI Insights:** Use AI to generate summaries and insights based on recorded achievements.
5. **Long-Term Motivation:** Encourage continued personal development by helping users recognize what they have already accomplished.

Proposal Scope Note: This proposal describes the intended solution and its key features. Implementation status, feature availability, and known limitations should be verified and documented separately in the technical design and final report.
